PROFESSIONAL SUMMARY

Motivated B.Tech Information Technology student at A.D. Patel Institute of Technology with a strong foundation in Java, Spring Boot, and object-oriented programming. Passionate about building scalable web applications and solving real-world problems. Experienced in full-stack development, machine learning integration, and collaborative hackathon environments. Quick learner driven to deliver quality software solutions.

TECHNICAL SKILLS

- Cross-Platform Development: RESTful API Integration, Multi-Tenant Systems, Microservices Basics
- Backend Technologies: Java (Spring Boot, Spring MVC), Hibernate (JPA), Node.js (Familiar)
- Frontend Technologies: JavaScript, HTML5, CSS3, Bootstrap 5, Thymeleaf, Responsive UI Development
- Databases & Storage: MySQL, MongoDB, Cloudinary API
- Core Concepts: OOPS, Data Structures & Algorithms (DSA), MVC Architecture, Git/GitHub
- Tools: Postman, Maven, XAMPP, VS Code, IntelliJ IDEA

PROFESSIONAL EXPERIENCE

Web Development Intern | Selkey Cybersecurity Pvt. Ltd. May 2026 – Present

- Contributing to enterprise-level multi-tenant CRM web applications designed for cross-platform accessibility.
- Developing reusable frontend components and validating responsive behavior across multiple browser environments.
- Collaborating with senior developers to debug API layers, improve data flow handling, and support system integrations.
- Using Git-based workflows to manage version control and coordinate staging deployments efficiently.

PROJECTS

Online House / Room Renting Marketplace (RENTIFY) | Java, Spring Boot, Thymeleaf, MySQL, Bootstrap 5, Cloudinary

[Live Link](#)

- Developed a full-stack rental marketplace application following the MVC architecture pattern.
- Integrated Cloudinary APIs for remote image storage and optimized media handling.
- Designed relational database mappings in MySQL for managing landlords, seekers, and property listings.
- Created responsive UI layouts compatible across desktop and mobile devices.
- Deployed the application on Render cloud platform.

Multi-Tier Movie Search & Recommendation Engine (MOVIESEARCH) | Python, Spring Boot, Flask, JavaScript, HTML5/CSS3

- Built a cross-platform recommendation system integrating a Python Flask ML engine with a Java Spring Boot backend.
- Designed RESTful communication pipelines to process structured JSON payloads and similarity-based recommendation data.
- Developed a lightweight JavaScript-based UI for real-time movie recommendations without page reloads.

HACKATHONS & LEADERSHIP

- Participant | Smart India Hackathon (SIH 2024 & SIH 2025) – Collaborated in rapid development sprints to build functional software prototypes within fixed timelines.
- IT Support Volunteer | International Conference STSD-2025 – Assisted with live video systems and hardware/software troubleshooting during conference operations.

EDUCATION

- B.Tech in Information Technology | A.D. Patel Institute of Technology, CVM University, Anand | Batch 2027 | CGPA: 7.64
- Class XII (HSC) – Science | Saraswati Shishukunj School, Anand | 70.92%
- Class X (SSC) | Saraswati Shishukunj School, Anand | 92.16%

CERTIFICATIONS

- [GeeksforGeeks Java Foundation Course](#)
- [GeeksforGeeks Git Version Control Certificate](#)
- Smart India Hackathon [2024](#) & [2025](#) Participation Certificates
- [Advanced Computer Software Courses Vacation Honors Track](#)
